

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1-10. (Canceled)

11. (Currently Amended) A digital camera comprising:

an optical lens;

an image sensor that generates image data for an image formed on the image sensor by the optical lens;

a memory that stores the image data for a plurality of images generated by the image sensor;

a display that displays the image data and print instruction information, the print instruction information including a print instruction for printing a plurality of images per one sheet;

an interface that transfers the image data to a printer; and

a user-operable selector that selects the print instruction for printing a plurality of images per one sheet image data to be printed by the printer; and

a terminal that transfers the image data, as selected by the selector, to an external printer wherein the display displays printing information which shows that the plurality of image data selected by the selector are printed as two or more image data per sheet or as one image data per sheet.

12. (Currently Amended) The digital camera of claim 11, wherein the terminal interface transmits the image data directly from the digital camera to the external printer.

13. (New) The digital camera of claim 11, wherein the printer is an external printer.
